International Workshop on
Effective Field Theories
from the Pion to the Upsilon

2-6 february 2009   Valencia   Jardí Botànic

How to configure *eduroam* (WIRELESS network) in Linux

The simplest way to connect to **eduroam** over wireless is by using the **Network Manager applet** which is now available in most Linux distributions.

Click on the applet and select **Connect to Other Wireless Network**.
Fill in the details as shown in the screen shot opposite replacing the Identity and Password fields with

Identity: eft09
Password: pionupsilon

Click the **Connect** button to connect to the eduroam network.

Congratulations! You have connected to eduroam!

Connect to Other Wireless Network

Existing wireless network

Enter the name of the wireless network to which you wish to connect.

Network Name: eduroam

Wireless Security: WPA Enterprise

EAP Method: PEAP

Key Type: Automatic (Default)

Identity: eft09

Password: pionupsilon

Anonymous Identity:

Client Certificate File: [?] (None)

CA Certificate File: [?] (None)

Private Key File: [?] (None)
